DETAILED ACTION***Election/Restriction***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 41-62, drawn to sequencing of nucleic acid by amplification, classified in class 435, subclass 91.2.
 - II. Claims 63-75 and 86-87, drawn to enzyme kit, classified in class 435, subclass 174.
 - III. Claims 76-85, drawn to method of synthesizing nucleic acid, classified in class 435, subclass 91.1.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions of Groups I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case, the method of sequencing of nucleic acids of Group I can be practiced by the RNA polymerase of Group II or by hybridization or by fragmenting the nucleic acids by nucleases. .
3. Inventions of Groups II and III are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case, the synthesis of nucleic acids of Group III can be practiced by the RNA polymerase of Group II or by chemical synthesis in an oligonucleotide synthesizer .

4. Inventions of Groups II and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions of determining the sequence of nucleic acids of Group I are not disclosed as capable of use together with synthesis of nucleic acids of Group III and they have different modes of operation, different functions, or different effects.

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

6. A telephone call was made to Jean Baker on February 11, 2002, to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CAR 1.143).

7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CAR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CAR 1.48(b) and by the fee required under 37 CAR 1.17(I).
